

Nº532 Dual Mono Amplifier

Release Notes

The purpose of this document is to communicate any points that are not fully discussed or to correct text in the Nº532 Dual Monaural Power Amplifier Owner's Manual (Rev. 1).

Manual revisions pertinent to the V1.10 software upgrade

Host Name

The Host Name is the network name given to the Nº532 amplifier. This host name is unique to each amplifier and is comprised of two parts that are separated by an underscore. The first part contains one to eight characters that can be modified via the internal Web page of the amplifier. The second part of the host name contains the last six characters of the MAC address. This MAC address is unique to each amplifier.

The Host Name default is "NO532_XXXXXX", where "x" stands for the last six characters of the unique MAC address for that amplifier.
